22	23 Danbury, CT Spatial Disorientation	24	25	26	27	28
29	30	1	2	3	4	5

lighter than air, and ultralights. **Why participate?** Regular proficiency training is essential to the safety of all pilots. In addition, completion of the "WINGS" program satisfies the requirements of FAR 61.56 (Flight Review). Be in touch with your strengths and weaknesses. **What are the requirements?** Attend an FAA sponsored safety seminar and receive 3 hours of flight instruction; an hour each on: take offs and landings, instrument flying, and basic airwork. All requirements must be completed within a 12-month period. Every 12 months, you can achieve another phase of the "WINGS" program. The requirements are the same for each phase. Receive a set of "WINGS" and a certificate for each phase. Consult Advisory Circular 61-91H for details.

CFI-DPE WORKSHOP

General Aviation Pilots Guide to Aircraft Fire Rescue.
Presented by Anthony C. Lorenti FAASTeam Rep., Pilot and Fire Fighter

Find out what information you have been missing when it comes to utilizing Fire Rescue services in an emergency. Will the FAA bring enforcement action against you if you "call for the trucks?" Do know what kinds of emergency services are available (or not) at each and every airport you operate to, from and over? Do you even need to declare an emergency in order to call for emergency equipment?

If you have an in-flight emergency or abnormal situation make sure your decision to land is based on the safety of the lives and property below you! In situations of urgency or distress don't let your A&P's location be of any consequence to you! Learn when to call it quits!

Auto Parking: East end of hangar

Aircraft parking: Limited parking next to the hangar, please follow the CAP Personnel for guidance and avoid blocking the hangar door and the State police aircraft.

ARE YOU READY FOR SUMMER FLYING?

Remember it is not quite summer yet.

- ✓ Allow sufficient time for thorough preflight planning
 - ✓ Give yourself a multitude of options
 - ✓ Review your pilot's operating handbook
- ✓ Dress so that you can conduct a thorough preflight and remember that it still gets cold at night.
 - ✓ Remove all frost from aircraft surfaces prior to flight
- ✓ Taxi speeds must be consistent with conditions, and use appropriate control inputs for the wind velocity and direction.
- ✓ Review aircraft performance numbers very carefully, remember at the outside temperature rises, your aircraft performance degrades
 - ✓ Use all available weather sources both before and during flight
 - ✓ Are you prepared for survival options?
 - ✓ File and activate a flight plan, use ATC flight following!
 - ✓ Tell someone where you are going, and when you should be back
- ✓ Have a healthy respect for weather, no matter what sort of equipment you operate.

If inclement weather is forecasted and you are wondering if a safety program has been cancelled, please call:
